

Centre console removal

- Step 1: Open the lid of the console box, lift up the carpet on the bottom and undo the screw.
(Note the cloth tab I have glued to the bottom of the carpet to make this easier in the future)

Step 2: Lift the console box to access the bolt underneath.

Step 3: Remove the bolt.

Step 4: Remove the four screws (two either side) holding the heater/radio console.

Step 5: Slide the main console towards the rear as far as you can to disengage the hook under the heater console.

Step 6: Remove the heater/radio console, disconnecting the radio wiring as you go.

Step 7: Reassemble everything in reverse order.

That's all, easy wasn't it :-)
